Brownfield Remediation

Urban Engineers applies a value engineering approach and risk-based decision-making to “turn brown into green.” In addition to our thorough grasp of environmental regulations and knowledge of the gamut of technical remediation issues, we have an in-depth understanding of the forces driving land development and understand what developers need. This knowledge allows us to effectively integrate remediation with development in order to save costs and shorten redevelopment schedules.

■ BUILDING AND PROPERTY ASSESSMENTS

- Property Condition Surveys (ASTM E2018-01)
- Asbestos and Lead-based Paint Management
- Mold Assessments and Indoor Air Quality Studies
- Demolition and Decommissioning Design
- Phase I Environmental Site Assessments

■ SOIL/GROUNDWATER CLEANUP PROGRAMS

- Site Characterization
- Remedial Action Plans
- Remediation System Design
- Fate and Transport Assessments
- Groundwater Modeling
- Risk Assessment
- Storage Tank Management
- Attainment Sampling/Site Closure

■ LAND DEVELOPMENT

- Surveying
- Civil/Site Engineering
- Mechanical/Electrical/Plumbing
- Structural Engineering
- Geotechnical and Foundation Engineering
- Traffic Studies
- Storm Water Management
- Wetlands Mitigation

■ CONSTRUCTION SERVICES

- Bid Assistance
- Construction Management
- Construction Inspection
- Claims and Litigation Support

■ AGENCY AND PUBLIC COORDINATION

- Grant Application Assistance
- Agency Negotiation
- Permitting
- Regulatory Compliance
- Presentations to Officials and the Public
