Urban provides our clients the opportunity to gain a competitive edge in the marketplace through the development of a proactive, Environmental Management System (EMS) that includes:

Environmental Management Systems

Environmental Management Systems

Whether your organization is private or public, an effective Environmental Management System (EMS) makes good sense. By identifying the causes of environmental problems and then eliminating them, an EMS can help you save money. Consider the following:

- Is it better to make a product (or provide a service) right the first time or to fix it later?
- Is it cheaper to prevent a spill in the first place or to clean it up afterwards?
- It is more cost-effective to prevent pollution or to manage it after it has been generated?

An EMS can improve your organization's bottom line by:

- Providing a cost-effective framework for managing environmental issues
- Reducing environmental regulatory liability
- Minimizing waste and conserving energy
- Preventing pollution
- Reducing raw material usage and recycling byproducts
- Streamlining operating processes
- Improving employee health, safety and morale
- Providing a defense for due diligence

Environmental Management Systems provide opportunities to gain competitive advantages. Let Urban show you how a proactive system can be an asset to your company's operation.

■ ENVIRONMENTAL AUDITS

- Conformance and Compliance
- Processes and Operations
- Local, State and Federal Regulations
- Hazard Communication Program
- RAB-Certified Auditors
- Gap Assessment

■ ENVIRONMENTAL COMPLIANCE TRACKING

- Residual/Hazardous Waste
- SARA Title III Reporting
- Clean Air and Water Acts
- Pollution Prevention
- Health and Safety
- Emergency Response Plans

■ EMS DOCUMENTATION

- Environmental Policy
- Management Responsibility
- Aspects and Impacts
- Objectives and Targets
- ISO 14001
- EMS Manual
 - Level I, II, III, IV Documentation
- Operational Procedures
- Forms and Records

■ EMS TRAINING

- Employee Awareness
- Roles and Responsibilities
- Conformance/Compliance
- Operational Controls
- Internal Auditing

■ EMS MANAGEMENT ACTIVITIES

- Manage and Review EMS
- Document Control Systems
- Corrective and Preventive
 - Action Reporting
- EMS Auditing
