

About Urban Engineers

Urban Engineers is a full-service, multi-disciplinary engineering firm. An industry leader and innovator, Urban provides comprehensive planning, engineering, environmental and construction services to solve infrastructure and building challenges of any magnitude and complexity. Areas of expertise include: Transportation, Facilities and Building Systems, Environmental, Planning/GIS, Program Management and Construction Services.

**Our goal is to be our clients' first choice for professional services.
Employee-Owned Founded 1960**

***ISO 9001:2000 Certified**

for the Planning, Design and Construction Management
of Engineering Projects

Geotechnical and Foundation Engineering

Architects, developers and owners utilize Urban's services for diverse projects.

- PLANNING | DESIGN | CONSTRUCTION MANAGEMENT
- TRANSPORTATION ■ PLANNING/GIS
- FACILITIES AND BUILDINGS SYSTEMS ■ PROGRAM MANAGEMENT
- ENVIRONMENTAL SERVICES ■ CONSTRUCTION SERVICES

Geotechnical and Foundation Engineering

Urban provides focused geotechnical services for a variety of project types, including buildings; dams and dikes; pipelines; airport facilities; railroads; waterfront structures; and roadway cuts and embankments. Our range of geotechnical capabilities support all phases of a project and include test boring programs, laboratory testing, engineering and design, construction observation and materials testing, and construction quality assurance. We have a strong record in assisting developers, architects, and private and public clients to develop design solutions that are practical and offer cost saving opportunities. Our knowledgeable staff is skilled in assessing the construction and long-term performance risks associated with subsurface conditions.

■ SUBSURFACE INVESTIGATIONS

- Surface Reconnaissance
- Drilling and Sampling
- Geophysical Investigations
- Foundation Design
- Pavement and Roadway Design
- Fill Evaluation
- Forensic Geotechnical Investigations

■ SLOPE STABILIZATION

- Slope Stability Investigation
- Rock Slope Stabilization
- Riprap
- Roller Compacted Concrete
- Soil Cement
- Proprietary Products

■ FOUNDATION DESIGN

- Spread and Strip Footings
- Mat Foundations
- Steel Piles: H-Piles, Pipe Piles, Step-Taper Piles
- Driven Pre-Cast Concrete Piles
- Drilled, Cast-In-Place Concrete Caissons
- Auger Cast Piles

■ RETAINING STRUCTURES

- Temporary Excavation Support Systems
- Highway Embankment Walls
- Waterfront Walls
- Gravity Walls
- Cantilever Walls
- Mechanically-Stabilized Earth Walls
- Crib Walls
- Slurry Walls

■ INSPECTION AND MATERIALS TESTING

- Construction Quality Control
- Non-Destructive Testing
- Soil and Rock Testing
