Planning

Urban's planning staff has the expertise in interdisciplinary transportation, land use and community design projects.

Planning

Communities are increasingly concerned about the varied aspects of their built environment. Transportation issues, including access, mobility, and cost-effectiveness, are as important as other quality of life concerns, such as economic development and the environment.

Urban Engineers believes that livable communities require an integrated approach to transportation and land-use planning. As part of a full-service engineering firm, the Planning Group works to develop creative ideas from concept through design and provide a realistic assessment of feasibility, cost, and performance.

With each project, Urban brings a long standing commitment to consensus building and an emphasis on identifying approaches that truly work for the community. Urban employs graphic design, GIS and 3D technology to communicate complex information in an effective and understandable way.

■ TRANSPORTATION PLANNING

- Data Collection
- Traffic Analysis
- Alternatives Development and Impact Analysis
- Traffic Calming
- Concept Development
- Corridor Planning Studies
- Multi-modal Circulation Plans
- Parking Strategies

■ BICYCLE AND PEDESTRIAN PLANNING

- Inventory & Analysis
- Facility Design
- Implementation Strategies

■ STREETScape IMPROVEMENTS

- Master Planning
- Streetscape Design
- Roadway Design
- Traffic Engineering
- Funding Strategies
- Construction Services
- Traffic Calming Tools
- Renderings and Visualizations

■ LAND-USE/ENVIRONMENTAL PLANNING

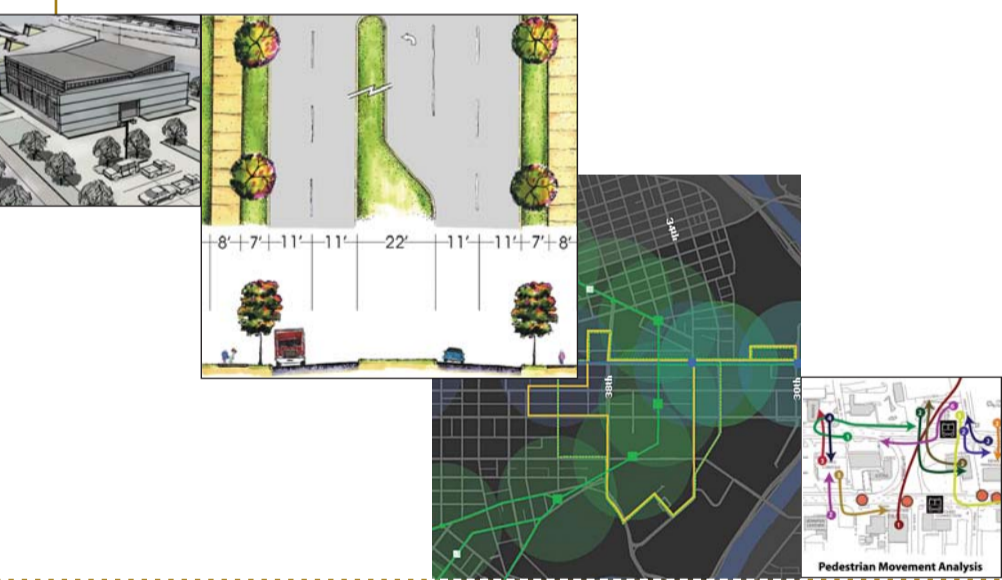

- Master Planning and Zoning
- Transit-Oriented Development
- Smart Growth Strategies
- Environmental Analysis

■ PUBLIC INVOLVEMENT

- Environmental Justice
- Community Impact Assessments
- Design Charrettes
- Public Meetings and Workshops
- Conflict Resolution, Consensus Building and Facilitation
- Multi-media Presentation Materials, including newsletters, website design, and 3D

■ TRANSIT PLANNING

- Route Planning
- ADA Compliance
- Intermodal Transfer
- Alternatives Analysis
- Feasibility Analysis
- Operations Analysis
