

# Aviation

Founded 1960 | ISO 9001:2008 Certified | Full Service Firm | Employee-Owned

## OUR MISSION:

*“We will strive to be our clients’ first choice through planning, engineering and management excellence”*

## AVIATION SERVICES OVERVIEW:

Founded in 1960, Urban Engineers (Urban) is an ISO 9001:2008-Certified, design, environmental, planning, and construction services consulting firm. We attribute our reputation and excellence as a recognized leader in our fields of professional practice to our ability to provide clients with a superior level of competence, quality, and commitment.

For over forty years, Urban has provided planning, engineering and construction services for airports and aviation facilities. This includes planning and design of runways, taxiways and aprons; terminals; maintenance facilities; hangars; roadways, bridges, and landside facilities; and construction services and inspection of both horizontal and vertical construction.

We believe airports provide a direct link to the economic growth of a community and metropolitan area. We listen to our client’s needs and apply our experience, knowledge, and innovative thinking to turn ideas into reality.

Bradley International Airport - Landside Perspective
